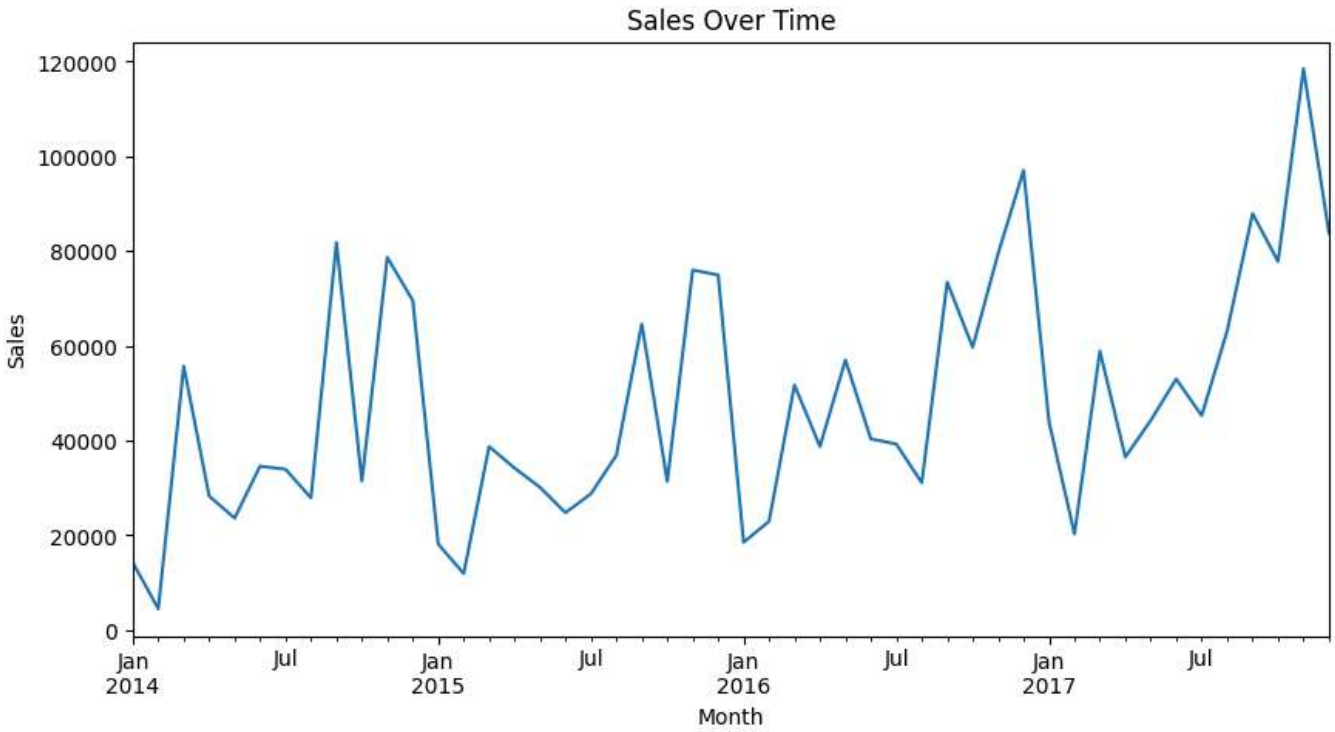
Retail Sales Analysis – Visual Report

1. Objective

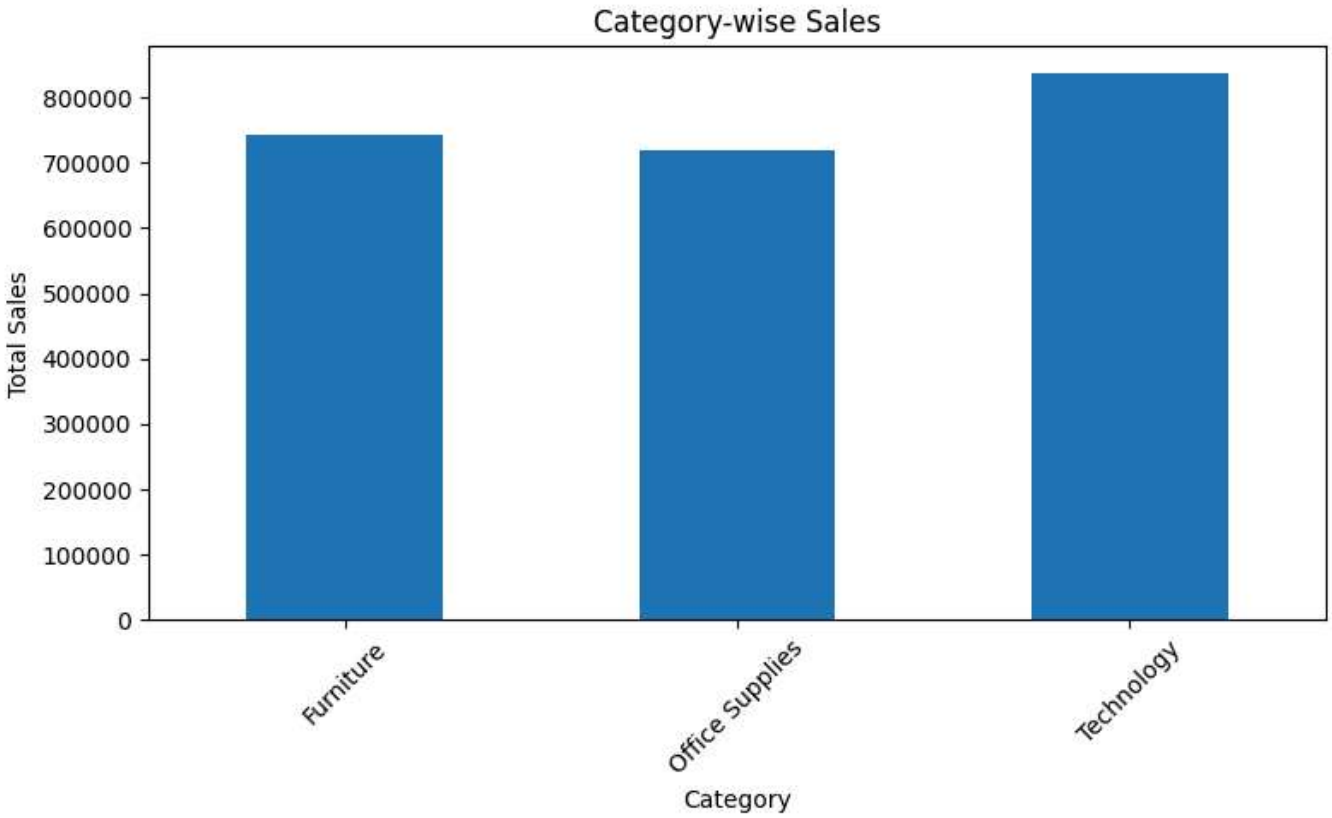
The objective of this report is to analyze retail sales data to identify trends, key drivers of profitability, and actionable business insights.

2. Sales Trend Over Time



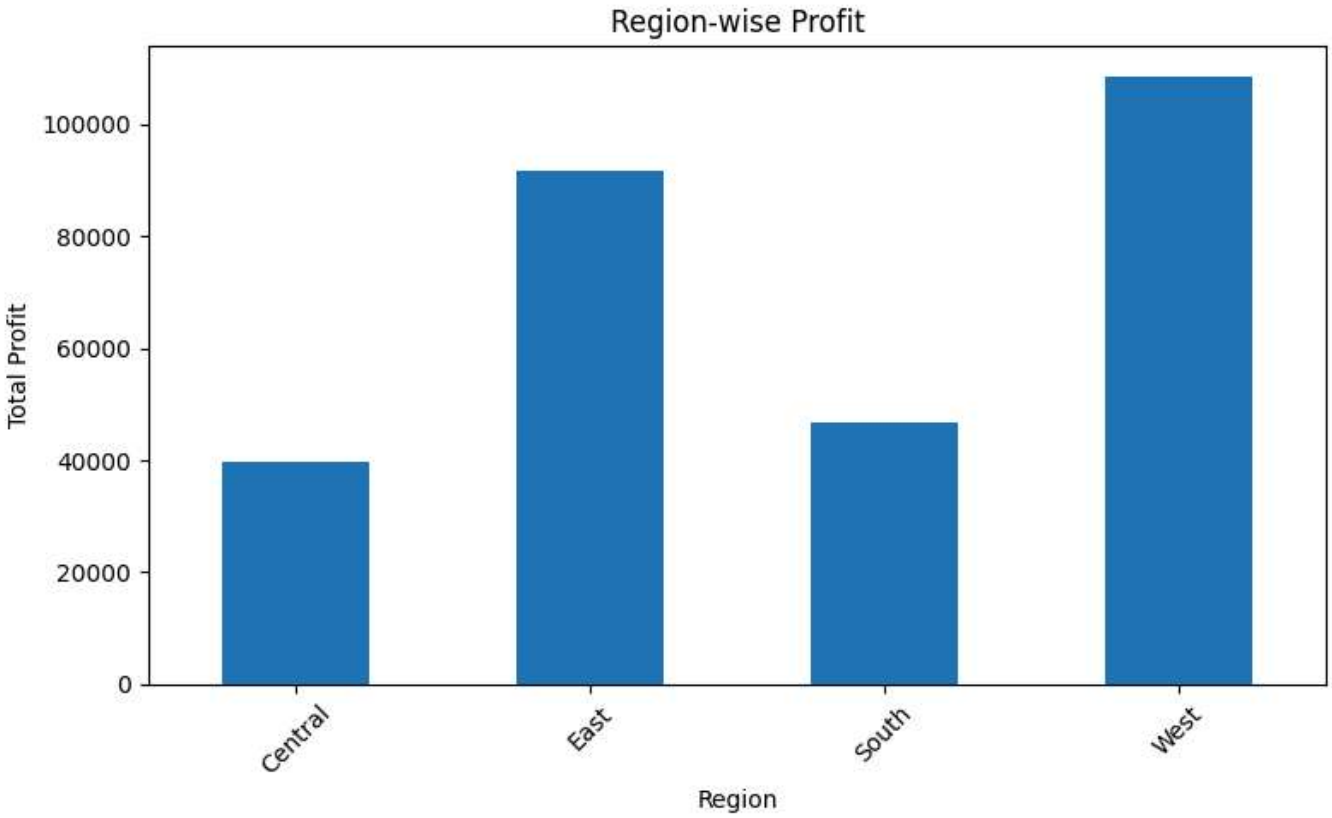
Sales over time show an overall increasing trend with noticeable fluctuations. These fluctuations indicate seasonal demand patterns, suggesting that certain periods experience higher sales. Identifying these peak periods can help in planning inventory and marketing strategies more effectively.

3. Category-wise Sales



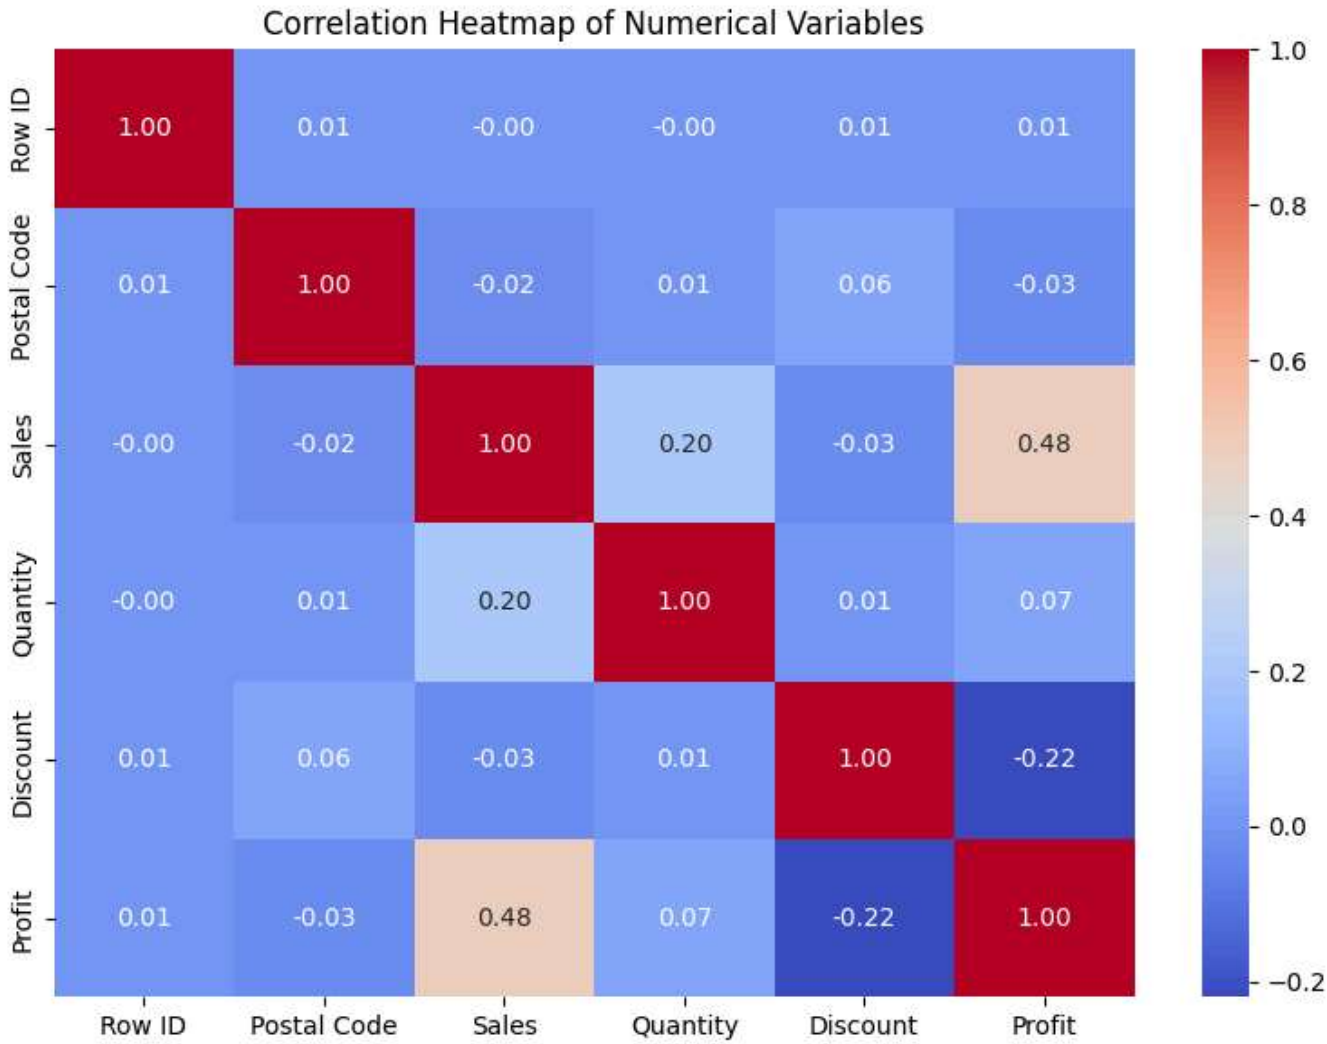
The analysis shows that certain product categories generate significantly higher sales, indicating strong customer demand. These categories act as key revenue drivers and should be prioritized in inventory planning and marketing strategies.

4. Region-wise Profit



Profit varies across regions, with some regions outperforming others. This indicates differences in market performance and demand. High-performing regions present opportunities for expansion, while underperforming regions may require strategic improvements.

5. Correlation Analysis



The correlation analysis shows that Sales and Profit are positively related, meaning higher sales generally lead to higher profit. However, Discount shows a negative relationship with Profit, indicating that excessive discounting can reduce profitability.

6. Top 10 Products

```
Product Name
Canon imageCLASS 2200 Advanced Copier                                    61599.824
Fellowes PB500 Electric Punch Plastic Comb Binding Machine with Manual Bind    27453.384
Cisco TelePresence System EX90 Videoconferencing Unit                    22638.480

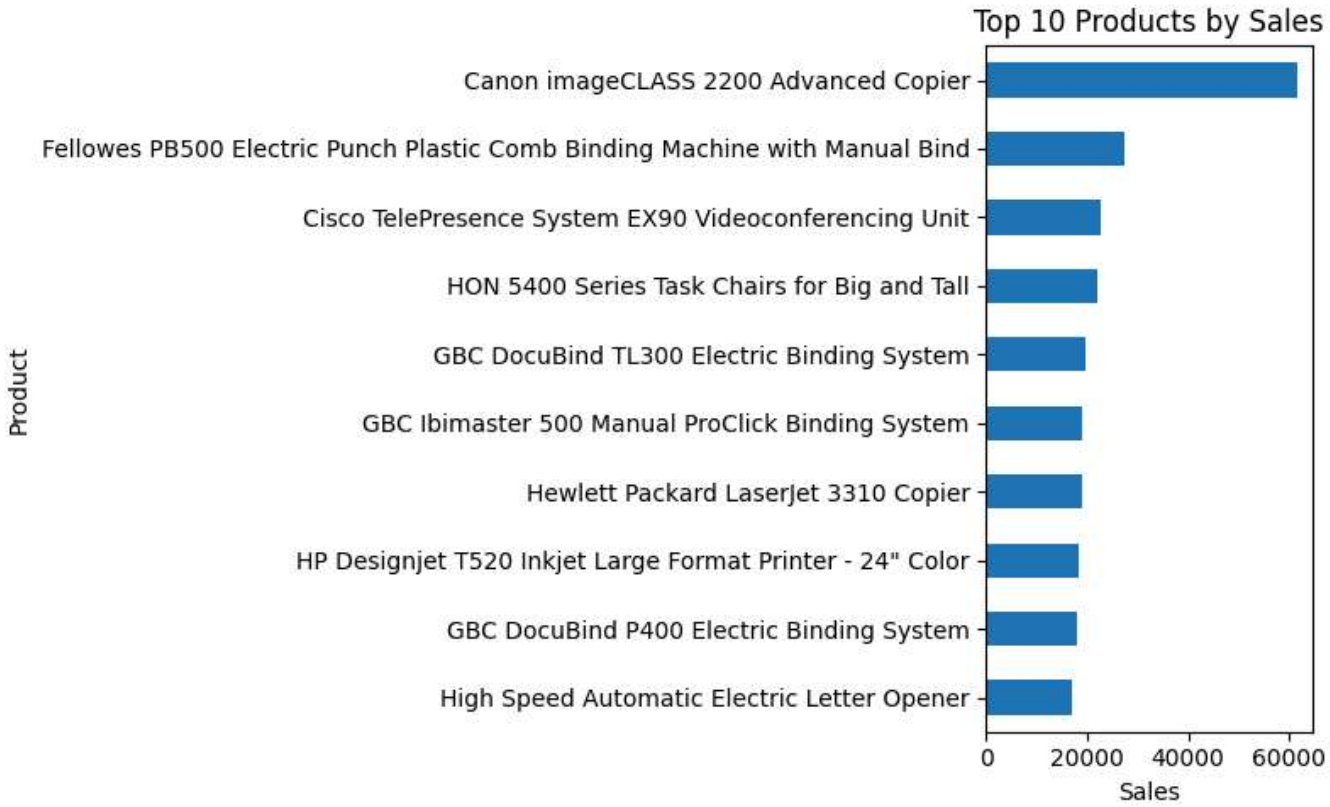
```



A small number of products contribute disproportionately to total sales, indicating revenue concentration. These top-performing products should be prioritized for inventory management, pricing strategies, and targeted promotions.

7. Key Insights

1.Sales show seasonal growth patterns, indicating peak demand periods.

2.High discounts negatively impact profit, reducing overall profitability.

3.Certain regions generate higher sales and profit, offering expansion opportunities.

4.A few product categories and products drive the majority of revenue.

8. Business Recommendations

- Optimize discount strategies to maintain a balance between sales growth and profitability
- Expand marketing and operations in high-performing regions
- Prioritize inventory and promotions for top-performing products and categories

9. Conclusion

This project demonstrates how data analysis can uncover meaningful patterns in sales performance. By analyzing trends, regional performance, and product-level contributions, we identified key factors affecting profitability and growth. The insights and recommendations provided can support data-driven decision-making and help improve overall business performance.
